

CAMPUSMATE AI

COLLEGE STUDENTS RECEIVE IMPORTANT INFORMATION THROUGH NOTICE BOARDS, PDFS, PHOTOGRAPHS, COLLEGE PORTALS, AND MESSAGING GROUPS. THEY MAY MISS DEADLINES, STRUGGLE TO UNDERSTAND LONG ANNOUNCEMENTS, OR SPEND UNNECESSARY TIME FINDING IMPORTANT DETAILS.

OBJECTIVE SOLUTION

The primary objective of **CampusMate AI** is to simplify how students access, understand, and interact with college notices using Generative AI powered by Gemma 4.

- **Simplify Information:** Convert lengthy and complex college notices into easy-to-understand summaries.
- **Extract Important Details:** Identify deadlines, dates, venues, eligibility criteria, and required actions mentioned in notices.
- **Enable Conversational Interaction:** Allow students to ask questions and receive answers based on the provided notice.
- **Support Multiple Input Formats:** Accept notice text and uploaded images.
- **Improve Accessibility:** Present formal administrative information in simple, student-friendly language.
- **Promote Reliable Information:** Clearly identify missing details instead of generating unsupported dates or instructions.

WIREFRAME

Student
(End User)
Opens the application
Upload or Paste Notice
Upload image or paste text
Select a Task
Summarize Notice
Extract Important Details
Explain in Simple Language
Ask a Question
Application Layer (Gradio + Python)
Process Input
(app.py)
Receive user input
Handle selected task
Prepare prompt
Call gemma_client.py
Model Integration
(gemma_client.py)
Format input (text/image)
Use ask() or ask_with_image()
Send request to Gemini API
Handle API response

No
End Session
Close or clear the conversation
Error / Invalid Input
Error Handling
Show meaningful error message
Handle API failures / unclear images

CORE FEATURES

Core Features of CampusMate AI:

- **1. AI-Powered Notice Summarization**
  Converts lengthy college notices into concise, easy-to-understand summaries using Gemma 4.
- **2. Important Detail Extraction**
  Identifies key information such as dates, deadlines, venues, eligibility criteria, and required actions mentioned in the notice.
- **3. Image and Text Input**
  Allows students to upload a notice image or paste the notice text for AI-based processing.
- **4. Simple-Language Explanation**
  Rewrites complex administrative language into clear, student-friendly explanations.
- **5. Contextual Question Answering**
  Enables students to ask follow-up questions about the provided notice and receive relevant answers based on the available context.
- **6. Missing-Information Awareness**
  Encourages transparent responses when details are absent from the notice instead of inventing dates, venues, or instructions.
- **7. Interactive User Interface**
  Uses Python to provide a simple interface for submitting notices, selecting tasks, and viewing AI-generated responses.
- **8. Error Handling**
  Provides a foundation for handling invalid inputs, unclear notice images, and API failures gracefully.

FUTURE SCOPE

- CampusMate AI can be enhanced into a comprehensive campus information assistant by introducing advanced features and integrations.
- **College Portal Integration:** Connect with official college websites and portals to access announcements from a centralized interface.
- **Automated Deadline Notifications:** Send reminders for examinations, assignment submissions, registrations, and upcoming events.
- **Multilingual Support:** Allow students to understand notices in Hindi and other regional languages.
- **Mobile Application:** Develop a mobile-friendly application for convenient access anytime and anywhere.
- **Secure Notice History:** Allow students to save and revisit previously analyzed notices.

CONCLUSION

- CampusMate AI is an AI-powered campus notice assistant designed to simplify how students access and understand college announcements. By using Gemma 4 with a Python interface, the project provides a conversational approach to processing notice text and images.
